Reviewer's report

Title: Could the Sasang Constitution Itself be a Risk Factor of Abdominal Obesity?

Version: 3 Date: 29 September 2012

Reviewer: Qi Wang

Reviewer's report:

Discretionary Revisions

1. It is generally believed that Sasang Constitutions were formed mainly from inherited factors. So if the authors have done family survey, the data will make the conclusion more persuasive.

2. As the authors said, environmental factors may be the acquired risk factors for AO. So this is an important direction for future research.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
