Reviewer's report

Title: Antibacterial constituents of three Cameroonian medicinal plants: Garcinia nobilis, Oricia suaveolens and Balsamocitrus camerunensis

Version: 4 Date: 12 December 2012

Reviewer: Horacio Bach

Reviewer's report:

Authors have not addressed my concerns regarding the standardized conditions to grow Mtb. I suggest that these results have to be eliminated from the manuscript.

Changes suggested by the authors were not included and the culturing conditions were not performed as expected to grow Mtb.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
