Reviewer’s report

Title: Ethnobotanical and antimicrobial study of some selected medicinal plants used in Khyber Pakhtunkhwa (KPK) as a potential source to cure infectious diseases

Version: 3 Date: 10 March 2014

Reviewer: GERALD NGO TEKE

Reviewer’s report:

Actually there is improvement the presentation of the manuscript.
- there is still need to correct some language errors. I suggest it should be read by a native of the language.
- Table 2. the decimals are not uniform.
- Figure 1. following the activity axis how can you say No Activity is representing the highest of the bars?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
