Reviewer’s report

Title: Complementary and alternative medicine use in adolescents with inflammatory bowel disease and juvenile idiopathic arthritis

Version: 2 Date: 10 March 2014

Reviewer: Sascha Meyer

Reviewer’s report:

This is a nice report without any major or minor flaws.
One minor criticism:
Abstract section: "In JIA, patients with active disease used more frequently CAM than peers with inactive disease".
This conclusion is not substantiated by the data presented in the abstract section (results).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

None to declare.
