Reviewer's report

Title: Antimalarial activity of plumbagin in the in vitro and animal models

Version: 2 Date: 17 December 2013

Reviewer: Porntip Chavalitshewinkoon-Petmitr

Reviewer's report:

According to the responses to all comments raised and correction was done in the revised manuscript, the quality of the manuscript is much better and can be accepted for the publication. However some language correction is still needed.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
