Reviewer's report

Title: Antitumor effect of Kanglaite(R) injection in human pancreatic cancer xenografts

Version: 4 Date: 24 May 2014

Reviewer: Zhijun Wang

Reviewer's report:

Minor Essential Revision.
Based on the results, KLT appeared to inhibit the phosphoration of mTOR and Akt, but not their expression. Thus, in the text, "KLT can inhibit PI3K/Akt/mTOR signaling via downregulation of pAkt and p-mTOR expression" may not be precise. It would be better to put "KLT can inhibit PI3K/Akt/mTOR signaling via inhibiting Akt and mTOR phosphoration".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
