Reviewer's report

Title: Evaluation of direct antiviral activity of Deva-5 herb formulation and extracts of five Asian plants against Influenza A Virus H3N8

Version: 3 Date: 18 April 2014

Reviewer: Sandra Adams

Reviewer's report:

Minor essential revisions:
In terms of the writing, there are still numerous minor grammatical errors that need to be corrected. For example:
Data Analysis section: instead of $R > 0.7$, replace with $R > 0.7$; instead of $(p = 0.05)$, replace with $(p = 0.05)$. I commented on this problem previously.
Minor grammatical errors in results section and discussion
“isolate A/Teal/Tunka/7/2010 (H3N8) have HA of H3 subtype and neuraminidase”; problem with number agreement (singular subject with plural verb)
“presence of tree components”; should be three
I have only cited a few of the most obvious errors.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
