Title: Genistein inhibits tumor invasion by suppressing multiple signal transduction pathways in human hepatocellular carcinoma cells

Version: 3 Date: 15 June 2013

Reviewer: Min-Hsiung Pan

Reviewer's report:

Manuscript Title “Genistein inhibits tumor invasion by suppressing multiple signal transduction pathways in human hepatocellular carcinoma cells”. This manuscript investigated the molecular mechanism of action of genistein inhibited TPA-induced tumor invasion. This is a well conducted study and well-written manuscript providing new data and useful information on genistein with interesting results.
