Reviewer’s report

Title: The Prevalence of General and Abdominal Obesity according to Sasang Constitution in Korea

Version: 1 Date: 16 December 2013

Reviewer: Junhee Lee

Reviewer’s report:

This paper reports the prevalence of General and Abdominal Obesity according to Sasang Constitution in Korea. Its procedures were generally based on scientific methodologies and conducted with precision, and it was reported in an objective and logically sound manner.

But I have a suggestion that the data already expressed in the table or figure had better not be described doubly in the text.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
