Reviewer’s report

**Title:** Discovery of potential anti-infectives against Staphylococcus aureus using a Caenorhabditis elegans infection model

**Version:** 3  
**Date:** 9 December 2013

**Reviewer:** Jean Giacomotto

**Reviewer’s report:**

10/12/2013  
BMC Complementary and Alternative Medicine, The Editors

Please find below a decision in regards to the revised manuscript entitled: “Discovery of potential anti-infectives against Staphylococcus aureus using a Caenorhabditis elegans infection model”

The authors reviewed the manuscript according to the reviewers’ comments. Except for one or two points that are not critical, as for example an absence of dose response assay in liquid versus solid media as requested, I found the review acceptable and the manuscript is now greatly improved.

I accept the present manuscript for publication without further revision.

Best regards,

Giacomotto Jean

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
