Reviewer's report

Title: Protective and restorative potency of Vitamin D on persistent biochemical autistic features induced in propionic acid-intoxicated rat pups

Version: 2 Date: 21 July 2014

Reviewer: John Cannell

Reviewer's report:

Major compulsory revision:
Page 2 and page 6

It is not clear in methods the difference between protective group and therapeutic group. The therapeutic group must have gotten PPA first and then 1,25 but it does not say that. As it reads now there is not difference between the two groups.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I am president of Vitamin D Council and I receive remuneration from Purity Products.
