Reviewer's report

Title: Prayer-for-health and complementary alternative medicine use among Malaysian breast cancer patients during chemotherapy

Version: 2  Date: 19 August 2014

Reviewer: Wolfgang Marx

Reviewer's report:

The study itself and analysis is well conducted. The changes that have been made has addressed my previous comments. My only remaining concern is that structure of the manuscript itself, particularly the introduction and discussion, could use some revision. In its current state, it is somewhat difficult to follow and some sections could be either shortened or revised.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
