This manuscript has improved substantially, and I have only one comment.

Figure 1: Illustration of the inclusion process of the survey participants

The figure should be organized as shown below. However, keep the original text. I have shorten the text just for demonstration.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
