Reviewer's report

Title: Experimental assessment of antidiarrheal and antisecretory activity of 80% methanolic leaf extract of Zehneria scabra in mice

Version: 3 Date: 29 August 2014

Reviewer: workineh shibeshi

Reviewer's report:

The authors have adequately addressed all comments but I could not trace how they respond to one of questions:

"The antidiarrheal activity of test substances is usually expressed using antidiarrheal index. The authors should show this parameter"

They responded as "Comment accepted and the parameters were included"

What parameters did they include?

Actually the authors mostly described their responses as "The Comment accepted and corrected" IS NOT THE USUAL WAY OF RESPONDING TO REVIEWER'S/EDITOR'S QUESTIONS;

THE AUTHORS SHOULD PRECISELY INDICATE HOW/WHAT THEY CORRECTED AND WHERE ? (LOCATION).

I did not find Antidiarrheal index (ADI) it in the manuscript ?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
