Reviewer's report

Title: Experimental assessment of antidiarrheal and antisecretory activity of 80% methanolic leaf extract of Zehneria scabra in mice

Version: 4 Date: 29 October 2014

Reviewer: Kishor Mazumder

Reviewer's report:

1. As author mentioned that E. coli induced antidiarrheal activity has already been published so this must be included with reference in discussion part of the manuscript.

2. Purity of drugs and reagents need to mention as a standard presentation

3. As author reasoned that the presence of tannins could reason of antidiarrhea and antisecretory effects of Z.scabra so measurement of total phenolic content will be praiseworthy.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
