Reviewer's report

Title: Antiplasmodial activity of solvent fractions of methanolic root extract of Dodonaea angustifolia in Plasmodium berghei infected mice

Version: 3 Date: 19 August 2014

Reviewer: Eshetu Mulisa

Reviewer's report:

I don't have major Compulsory Revisions comments. But Minor Essential Revisions comments as follows:

1. Line 114……aim of present study was……
2. Line 130-132…there is no need to write “the plant was………..in vivo studies”
3. For acute toxicity study..you should write the result of cage side observation for 14 days
4. Line 151…. aged 6-8 weeks,
5. Table 3 should be on one page
6. The style of the table is older type…please modify it.
7. The limitation the study was not stated well.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
