Reviewer’s report

Title: Antispasmodic and antidiarrhoeal activity of the fruit of Rosa moschata (J)

Version: 3 Date: 7 October 2014

Reviewer: GERALD NGO TEKE

Reviewer's report:

Minor Revision

Great need of language check

L 26: Insert- been ; the: The fruit of Rosa moschata has traditionally been used for the treatment

L 53: Insert- the: Plants have been used from a long while for the treatment of various disease

L 55-56 : replace ‘synthetic’ with ‘natural’... safe as compared to synthetic products, so the beliefs on using the synthetic products is decreasing compared to natural products.

L 64 : Are you referring to biliary infection? ... cases and in bilious affections…

L 101: replace ‘principals’ with ‘principles’ Plant extracts was tested for various active principals…

L 160: add the phrase indicated... group as positive control. 10 mL/kg of castor oil (p.o.) was given to all the groups after one hour ‘post extract/test sample treatment’.

L 166: which statistical tool was used to analyze data collected?

L 173 -174 … profile of the samples which may determines that it can be possible candidate for a development of herbal product.

It is better as ‘... profile of the sample making it a possible candidate for the development of herbal products’. You may adjust otherwise.

L 177- 184: Too long a sentence: For this purpose this study was..... and 0.16 (0.13 – 0.21), respectively (Fig. 2B). Try to adjust this.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
