Title: Bu-Zhong-Yi-Qi Pill Alleviate the Chemotherapy-Related Fatigue in 4T1 Murine Breast Cancer Model.

Version: 2 Date: 28 August 2014

Reviewer: Cheng-Shyong Chang

Reviewer's report:

Major Compulsory Revisions:
1. Please clarify all the number of mice in different time and experiment in the text and figures.
2. From the figure 5 we can found more significant problem of cancer related fatigue and no effect of BZYQ for that. Why you just focus about chemotherapy related fatigue and the effect of BZYQ is so insignificant?
3. You taken out 10 mice for weight-loaded swimming test every 7 days. Why you just test 10 mice of each group and how you keep the some 10 mice in each test?
4. You used 10 mice in each group for observed of survival so how many tumors were excised from the mice and weighed at the end of the experiment? How many mice used in the test for tumor weight? How you make choice about this 10 mice in different group?
5. Your will advise to add about the limitation of your study.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable
