Reviewer's report

Title: Lavender oil suppresses indoleamine 2,3-dioxygenase activity in human PBMC

Version: 2 Date: 9 July 2014

Reviewer: José-Enrique E O'Connor

Reviewer's report:

Major Compulsory Revisions
None

Minor Essential Revisions
The term VIABILITY in Results and Fig. 2 is misleading, as what authors really estimate is relative cell abundance (or cell number) in the cultures untreated or treated with lavender oil.
I suggest changing accordingly in the text and in the axis legends of Fig. 2

Discretionary Revisions
None

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
