**Reviewer's report**

**Title:** DanQi Pill protects against heart failure through the arachidonic acid metabolism pathway by attenuating different cyclooxygenases and leukotrienes

**Version:** 4  **Date:** 5 February 2014

**Reviewer:** Maradumane Mohan

**Reviewer's report:**

In my original review, I suggested to include a model to explain the pathway. I think the authors got confused with the experimental model. I meant to explain by depicting pathway as a figure. It would help readers understand the study in a nutshell.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.
