Reviewer's report

Title: Vibratory stimulation increase the electro-cutaneous sensory detection and pain thresholds in women but not in men

Version: 3 Date: 20 April 2006

Reviewer: Navil F Sethna

Reviewer's report:

General
I am satisfied with the authors' amendments and have no further queries or comments.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
