Reviewer’s report

Title: CAM therapies among primary care patients using opioid therapy for chronic pain

Version: 3 Date: 15 February 2007

Reviewer: Wolf Mehling

Reviewer’s report:

General

most problems were addressed in a satisfactory way

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
I still would like to see unadjusted ORs, leave out the column with p-values and add those similar to table 1 as *, **, *** for p<0.05, p < 0.01, and p<0.005 respectively.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests
