Reviewer’s report

Title: Immunomodulation of murine collagen-induced arthritis by N, N-dimethylglycine and a preparation of Perna canaliculus

Version: 2 Date: 24 May 2007

Reviewer: Rene Toes

Reviewer’s report:

The authors did not respond adequately to our comments. However, I do understand that not all tissues and materials are still available and therefore, performing the studies again just to answer my questions would, I think, represent a tremendous effort. Therefore, I think that the manuscript is acceptable for publication
