Reviewer’s report

Title: Healing Potential of Picrorhiza kurroa (Scrofulariaceae) rhizomes against indomethacin-induced gastric ulceration: an experimental evaluation

Version: 3 Date: 13 December 2007

Reviewer: Shinichi Kato

Reviewer’s report:

This manuscript was mostly revised according to my previous comments. Thus, I recommend to accept this manuscript in your journal.

Please number your comments and divide them into

- Major Compulsory Revisions
The author must respond to these before a decision on publication can be reached. For example, additional necessary experiments or controls, statistical mistakes, errors in interpretation.

- Minor Essential Revisions
The author can be trusted to make these. For example, missing labels on figures, the wrong use of a term, spelling mistakes.

x Discretionary Revisions
These are recommendations for improvement which the author can choose to ignore. For example clarifications, data that would be useful but not essential.

Please note that both the comments entered here and answers to the questions below constitute the report, bearing your name, that will be forwarded to the authors and published on the site if the article is accepted.

What next?: Accept without revision

Level of interest: An article of limited interest

Quality of written English: Acceptable
