Reviewer's report

Title: Adult Vaccination Coverage Levels Among Users of Complementary/Alternative Medicine--Results from the 2002 National Health Interview Survey (NHIS)

Version: 1 Date: 14 November 2007

Reviewer: Gary Euler

Reviewer's report:

- Minor Essential Revisions

1. Conclusion section of abstract and of manuscript should start with a summary statement about the most major finding such as: Vaccination rates were not lower among CAM users compared to non CAM users.

2. Vaccination rates are not demographic variables so would make the necessary change in table title.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no financial competing interests in relation to this paper, however, the first and last authors on this manuscript are work associates of mine. We work in the same division but in different branches.
