Reviewer's report

Title: Animal-based folk remedies sold in public markets in Crato and Juazeiro do Norte, Ceara, Brazil.

Version: 1 Date: 31 March 2009

Reviewer: Eliana Rodrigues

Reviewer's report:

Major Compulsory Revisions
The study is interesting, but there is a serious methodological fault. Animals (the data of the study) were not collected, so the species could not be asserted. The authors mention that some of them were collected (they should be marked along the text or in Table 2)

Minor Essential Revisions
Did the consensus take into account the parts of the animals cited among the erveiros?

Discretionary Revisions
Table 3 - these data should be presented in a clearly way.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
