Title: Australian women's use of complementary and alternative medicines (CAM) to enhance fertility: exploring the experiences of women and practitioners

Version: 2 Date: 20 November 2009

Reviewer: Alison Heawood

Reviewer's report:

Re-review of manuscript MS: 6035653812982822
Reviewer: Alison Heawood

The authors’ have taken care to address the points raised in the first review. Below are a couple of suggestions for minor amendments.

Minor amendments

1. p.10 - say that focus groups were digitally recorded and then at top of p.11 say the 'audiotapes' were checked. Change to 'audio recordings’?

2. Is the sub-theme 'Non disclosure of CAM use' within the second global theme actually a separate major theme? I wondered whether it quite sat right under ‘Negative experiences of ART’? Could it be a final global theme about relationship (or or lack of) between CAM and conventional care? If so, could include any data about communication/lack of between ART and CAM practitioners. I leave this to the authors’ and editor’s discretion.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
