Reviewer's report

Title: Australian women's use of complementary and alternative medicines (CAM) to enhance fertility: exploring the experiences of women and practitioners

Version: 2 Date: 19 November 2009

Reviewer: Fuschia M. Sirois

Reviewer's report:

Overall, the authors have been very responsive to the reviewer comments and have addressed them in a thorough and thoughtful manner. Other than the one minor revision presented below, I am satisfied with the revisions.

Minor essential revisions

The paper referenced in the following section is incorrect:

"Sirois (2008) reports the motivation for CAM use in Canada has shifted away from 'push' factors such dissatisfaction with orthodox medicine to 'pull' factors including the holistic approach of CAM [31]."

- The reference given for 31 is the Sirois & Gick (2002) paper which is incorrect; what is needed is the Sirois BMC CAM (2008) paper. Please add this missing reference.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
