Reviewer's report

Title: Attitude and prevalence of use of herbal medicines among pregnant women in Nigeria

Version: 2 Date: 20 August 2009

Reviewer: Donald M Marcus

Reviewer's report:

The revised paper is improved in clarity. However, I am disappointed that the authors did not respond to my previous comment #4, about providing more information about the potential hazards to the fetus of herbal remedies, and including more recent references. Most of the references provide are from the 1990s, and they should have been updated.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
