Reviewer's report

Title: Studies of the in vitro anticancer, antimicrobial and antioxidant potentials of selected Yemeni medicinal plants from the island Soqotra

Version: 1 Date: 23 January 2009

Reviewer: Shang-Tzen Chang

Reviewer's report:

The paper (Studies of the in vitro anticancer, antimicrobial and antioxidant potentials of selected Yemeni medicinal plants from the island Soqotra) should be rejected or accepted as a short communication. The article was of limited interest. Authors have published a series of papers, listed below, with similar topic, assay, and presentational type etc from 2001. Authors didn’t show the replicate number of data in “Material and methods” or Tables, and there was no statistical analysis.

Best regards.

Sincerely yours,

Shang-Tzen Chang
