Reviewer’s report

Title: Intranodal palisaded myofibroblastoma originating from retroperitoneum: An unusual origin.

Version: 1 Date: 28 February 2011

Reviewer: Agatha Kondi-Pafiti

Reviewer’s report:

This is an interesting case report that describes a rare lesion that developed in an unusual place. It is worth publishing because it adds to our information about this rare neoplastic process. I recommend that it is published.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
