Reviewer’s report

Title: Plasma concentrations of 25-hydroxyvitamin D among Jordanians: Effect of biological and habitual factors on vitamin D status

Version: 2 Date: 20 June 2011

Reviewer: Bruce Hollis

Reviewer’s report:

A nice observational study in a population with little information available. I would make the suggestion that the authors discuss their findings with respect to the recent IOM report on vitamin D and also the recent Endocrine Society report on vitamin D.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
