Reviewer's report

Title: Morphological distribution of u chains and CD15 receptors in colorectal poop and adenocarcinoma specimens

Version: 1 Date: 24 January 2013

Reviewer: Eiji Mekata

Reviewer's report:

This article became the persuasive thing, because some parts were added to discussion. Researchers argue about the immunoreaction of the host, but examination of the malignancy of tumor in itself is not enough. They should assume it a future examination problem.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
