Reviewer's report

Title: Giant osteoclasts in patients under bisphosphonates

Version: 2 Date: 25 April 2014

Reviewer: Ming Hao Zheng

Reviewer's report:

While authors has addressed most of the questions. The figure 1 of giant OC has been referred to case 1 and 2, which is not acceptable. Authors will need to present two panel of giant OC as they are two different cases. In addition, authors need to provide the quantitative data on the number of giant OC that are not attached to bone surface.

Level of interest: An article whose findings are important to those with closely related research interests.

Quality of written English: Needs some language corrections before being published.

Statistical review: No, the manuscript does not need to be seen by a statistician.
