Reviewer's report

Title: Challenging dedifferentiated liposarcoma identified by MDM2-amplification, two case reports

Version: 2 Date: 27 April 2014

Reviewer: Yoon-La Choi

Reviewer's report:

This report described two cases of dedifferentiated liposarcoma which had been confirmed by MDM2-amplification. Those case could be diagnsotic challenging in daily practice. However, the authors' procedure is well known approach and the report does not give any further information in this field.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
