Reviewer's report

**Title:** Ultrastructural characterization of primary cilia in pathologically characterized human glioblastoma multiforme (GBM) tumors.

**Version:** 1  **Date:** 30 August 2014

**Reviewer:** Gabriel Arismendi-Morillo

**Reviewer's report:**

Is an excellent study of ultrastructural cilia of GBM in human's samples. It is organized and ethical aspects are noted. Shows excellent descriptions and conclusions adapted to the results. The limitations are established, as well as, the importance of the findings.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
