Reviewer's report

Title: Morphologic and Immunophenotypic Evidence of In-Situ Kaposi Sarcoma

Version: Date: 22 August 2006

Reviewer: thierry simonart

Reviewer's report:

General
This is a nicely documented case report supporting the development of an in situ form of Kaposi’s sarcoma directly from lymphatics in the setting of chronic lymphedema.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
The recent paper by Ramdial et al (J Cutan Pathol, 2006) could be referenced.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
