Reviewer’s report

Title: The calcium-binding protein S100P in normal and malignant human tissues

Version: 2 Date: 29 June 2007

Reviewer: Sven Diederichs

Reviewer’s report:

General

The authors have sufficiently answered all major points so that the paper is now acceptable for publication in BMC Clinical Pathology.

----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
