Reviewer’s report

Title: Testing for hereditary thrombophilia: a retrospective analysis of testing referred to a national laboratory

Version: 2 Date: 13 January 2008

Reviewer: W Craig Hooper

Reviewer’s report:

This is well written paper with the appropriate limitations noted. The conclusions are sound based on their data. The paper could perhaps benefit from a brief summary of the current debate whether to test or not to test...a point which does create some confusion among providers.....

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
