The revised version of the manuscript is very well clearly written. I'm very pleased with this version.

I have only few minor comments:
Abstract, page 2. Conclusions: Should it be "what" instead of wha'?
In pages 9, 11 and 12 there are "french o letters". I tried to explain this in my previous report, but in the version the author had received the two "o" letters looked the same. However, in some "rote" and "role" words the "o" has "a hat", a french accent. These words are in page 9 (line 12), page 11 (lines 5 and 6) and in page 12 (last paragraph, line 4).
