Reviewer's report

Title: Improving capacity for evidence-based practice in South East Asia: evaluating the role of research fellowships in the SEA-ORCHID Project

Version: 2 Date: 4 March 2010

Reviewer: angela mary M tod

Reviewer's report:

The authors have addressed the points made by the peer reviewers. they have acknowledged the limitations of the study and claims that can be made of the data. Despite the limitations it is of value to share the experiences of an educational initiative such as this. It is a well structured and clearly written article. I can see no reason why it should not proceed to publication

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
