Reviewer's report

Title: Global Health Education: a cross-sectional study among German medical students to identify needs, deficits and potential benefits (Part 2 of 2: Knowledge gaps and potential benefits)

Version: 3 Date: 16 August 2010

Reviewer: Karyn Baum

Reviewer's report:

I would recommend making the point that it is not at all surprising that students who have done rotations abroad, esp in developing countries, find this learning of this SDH information more important. Also, I am still unclear how learning the SDH world-wide will make them better physicians in Germany.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
