Reviewer’s report

Title: Statistics teaching in medical school: Opinions of practising doctors

Version: 1 Date: 14 July 2010

Reviewer: Bruno Ledergerber

Reviewer’s report:

This is an interesting survey on doctors' views about their own undergraduate training in statistics concluding that the relevance of this training was often not recognized at the time and that good teaching should include more real research studies relevant to clinical work.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
