Reviewer’s report

Title: THE VAXED PROJECT: An Assessment of Immunization Education in Canadian Health Professional Programs

Version: 2 Date: 31 August 2010

Reviewer: Paolo Bonanni

Reviewer’s report:

The Authors have replied to almost all the observation to the previous version. However, there is still room for improvement in clarity by giving the number of nursing schools in Canada to which the questionnaire was distributed (still missing). More importance should still be attributed in the discussion to the fact that, given the low response rate, the situation described in the paper might be an overestimation of what is really taught and known by students on vaccines.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
