Reviewer's report

Title: Global health competencies and approaches in medical education: a literature review

Version: 1 Date: 30 September 2010

Reviewer: Susan Moffatt-Bruce

Reviewer's report:

the authors have addressed a very important curricular change that is forthcoming. I thought their review was very inclusive. It would be ideal if the authors included some examples of how their own medical student curriculum would change considering this review.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
