Reviewer’s report

Title: Doctors and nurses benefit from interprofessional online education in dermatology

Version: 2 Date: 10 September 2011

Reviewer: Janet Tworek

Reviewer’s report:

Thank you for your additions. The design and intentionality of the learning through the distance course is now clearer. In your continued work to perfect this online of ring, consider the barrier of time and how this might be resolved in the (re)redesign of your course for the benefit of busy professionals. You may want to also consider aspects of how MDs and nurses might learn from each other through their disciplinary conceptualizations of the content, as well as how the content is discussed with patients/ patient concerns are addressed in diagnosis and treatment, or other related treatment issues.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
