Reviewer’s report

**Title:** Reinforcing Outpatient Medical Student Learning Using Brief Computer Tutorials: The Patient-Teacher-Tutorial Sequence.

**Version:** 2  **Date:** 16 June 2012

**Reviewer:** Norman Berman

**Reviewer’s report:**

This revised manuscript is a significant improvement from the original work. I feel this is a substantial contribution to the medical educate literature, and an idea for CAI integration that should drive actual integration, CAI development and future research.

There are a few remaining typographical errors and omissions which the author needs to correct.

I have no remaining recommendations for revision of the manuscript, and commend the authors for their work.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
