Reviewer's report

Title: Medical Students' Choices of Specialty in The Gambia: The Need for Career Counselling

Version: 3 Date: 25 June 2012

Reviewer: Jean-Karl Soler

Reviewer's report:

Dear Sir

The methodology section is now more correctly placed, numbering of tables and referencing have improved, and there is some contrast with existing literature. However, confidence intervals for sample estimates of population figures were not added, and even though p-values are now added to tables, the actual test performed is not clear (p-value of what?) and the interpretation is not attempted in the paper.

Regards

Jean K Soler
