Reviewer’s report

Title: Inertial sensor real-time feedback enhances the learning of cervical spine manipulation: a prospective study

Version: 2 Date: 18 February 2014

Reviewer: John Triano

Reviewer’s report:

Major Compulsory Revisions
The authors have been largely responsive to reviewer comments, however, there remains significant lack of clarity around the role of “tuition”.

Tuition as this reviewer understands is "a sum of money charged for teaching or instruction by a school, college, or university"

What is the hypothesis related to tuition? What role does tuition play in the project?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No competing interests.
