Reviewer's report

Title: What makes a great radiology review course lecture? The Ottawa Radiology Resident Review Course experience

Version: 1 Date: 11 November 2013

Reviewer: Rahul Arya

Reviewer's report:

General comments
1. Nice study. As radiologists, we do value image quality, which the results of the study speak for.

Major Compulsory Revision
1. The discussion section can perhaps be elaborated on. Perhaps, more evidence and business literature can be cited. What makes a good presentation in general, keeping the audience engaged, asking them questions, knowing the material well etc.

2. Collection of subjective data does limit the study. Perhaps, the subjective variables could also be reviewed by other individuals.

3. What is defined as speak spontaneity?

4. How is the tone being graded?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
